Subject: RE: BaP cardiovascular MOA summary (TD BaP-16-1 under TO EP-G12C-00255)

OK, thanks Heather. Was the reason so many papers were retrieved because it could not be determined whether they were in vivo or in vitro mechanistic papers from the abstracts?

Hello Kathleen-

As of today, we have received 158 of 172 requested papers from the cardiovascular literature search for BaP. A total of 10 papers are pending, and 4 requests were foreign language papers for which retrieval was stopped. Of the pending references, only one (citation below) appears to be relevant to the in vivo cardiovascular MOA text. I have finished drafting the text without this paper, and Peter will be reviewing it over the next few days. We should be able to deliver the draft text to you early next week.

Subject: RE: TD BaP-16-1 under TO EP-G12C-00255

Hi Kathleen-

In follow-up to Julie's email below, I wanted to let you know the current status of the BaP cardiovascular literature search retrieval. As of today, 91/172 selected references have been retrieved. We requested rush retrieval on 26 in vivo animal and human studies; of these, 16 have been retrieved and 10 remain pending.

Ex. 5 Deliberative Process (DP)

I will provide another update on retrieval early next week; hopefully everything will be available by then, and we will be able to wrap up the text. Let me know if you have any questions.

Thanks-
Heather

Hi Kathleen,

I should have mentioned a possible retrieval lag during our kick off call. I will send another update later this week to let you know the status of the retrieval. I apologize for the delay. I appreciate the information you sent regarding the final SAB report. Please let us know if we can be of further assistance in your response to SAB comments.

Best regards,

Julie

OK. Thanks for the update, Juile. Next time I'll try to remember to build in a few days for reference retrieval.

Hi Kathleen,

The targeted search was completed, screened and uploaded to HERO; however, there have been some delays in retrieving the selected papers. Megan Riccardi was in touch with HERO staff last week regarding this issue. Heather has prepared a first draft of the high level summary of in vivo evidence of BaP cardiotoxicity. She will revise it as necessary after she has reviewed the papers from the lit. search. Peter will provide QC review before we deliver the draft to you (hopefully later this week, depending on retrieval). Please let me know if you have questions or need further information.

Thanks very much,

Julie

Hi Julie, could I get an update on the status of this TD?

Also, I wanted to let you know that the SAB released their final report on BaP last week. The only significant changes involve them further distilling their suggestions into a bulleted list of recommendations under each charge question. The added bulleted comments that overlap with what we had asked you to respond to include the following:

Hi Kathleen,

A staffing plan to accompany the TD cost estimate that I sent yesterday is shown below. Please let me know if you need additional information prior to our kick off conference call. I look forward to talking with you soon.

Staff	Labor Category	Tasks
Megan Riccardi	Ex. 4 CBI	Develop and test targeted search; upload searches to HERO/project page tagging; revise lit. search documentation; final changes to project page
Sarah Rosenberg		QC query strings
Kim Zaccaria		Screen lit. search findings
Debbie Joly		Request retrieval and download papers for review
Heather Carlson Lynch		Prepare high level summary of in vivo evidence for cardiotoxicity in mammals
Peter McClure		QC drafted text
Julie Melia		Administration

Thanks very much,

Julie
